Form E99 - Plant-wide-Pollutant Emissions Summary

This plant-wide pollutant emissions summary report is your company's official record for overall plant emissions. It may be used as the basis for the determination of your annual permit fees. This emissions summary should report the total actual emissions for the applicable emissions year. Each pollutant that is emitted from your plant should be reported on this form. The same emissions should *not* be included in more than one pollutant category, unless clearly noted. If a specific pollutant does not apply to your plant, then enter "NA" in the **middle** column and leave the emissions blank.

Please make certain that all reported values are as reasonable and realistic as practical, neither overstated nor understated. Some of these values reported may need to be based on estimations and/or calculations. These reported values must agree with the various source emissions, which can be supported by the values reported on the appropriate other LMAPCD emissions inventory forms.

Contact Person: Enter the name of the appropriate technical contact person for this process. This is the person the APCD engineer reviewing the submittal can contact for additional information or explanations. Please enter this person's job title, work e-mail address (if any) and daytime telephone number in the next boxes.

Certification: The certifying individual must be a responsible company official, pursuant to LMAPCD Regulation 2.16, Section 3.5.11, if a Title V operating permit has been issued. For all other permitted sources, the certifying individual shall be an authorized person of the company. Fill in the name, title and contact information of the certifying official. The certifying official must sign and date the completed form.
